PROFESSIONAL SUMMARY

Enthusiastic computer science undergraduate with strong foundational skills in software development and programming, Seeking an entry-level Software engineer/ Full-stack developer role. Proficient in Python, JavaScript, Django, MySQL, SQL, HTML, CSS, and ReactJS. Hands-on experience in developing web applications through academic and internship projects. Strong understanding of frontend and backend development, database management, and responsive web design and development. Demonstrates strong analytical, problem-solving, teamwork, and communication skills. Passionate about building scalable, efficient, and user-focused software solutions while continuously learning emerging technologies

EDUCATION

Bachelor of Computer Science and Engineering (2022-2026)

Agni College of Technology | Anna university
Computer Science and Engineering with 8.0 CGPA

HSC - Higher Secondary School (2021-2022)

Government Higher Secondary School (XII - HSC)

SSLC - (2019-2020)

Government Higher Secondary School (X - SSLC)

TECHNICAL SKILLS

- **Programming Languages:** Python, JavaScript
- **Frameworks & Libraries:** Django, Bootstrap, React.js
- **Web Technologies:** HTML, CSS
- **Database:** SQL, MySQL
- **Tools:** Figma, GitHub, Visual Studio, Antigravity
- **Soft Skills:** Problem solving, Team Collaboration, Time Management, Communication Skills

INTERNSHIP

Full Stack Developer Intern / Intern-delivery

Mar 2026 - May 2026

Virtusa Consulting Services Pvt.Ltd

Remote

- Developed responsive web applications using Python, JavaScript, Django, SQL, HTML, CSS, Bootstrap and React.js.
- Built and integrated REST APIs for frontend and backend communication.
- Collaborated remotely with development teams using Git and Agile practices.
- Assisted in debugging, testing, and improving application performance.
- Worked on database operations and responsive UI enhancements.

PROJECTS

GuardianAI-Unified AI Safety & Recovery System for Mass Gatherings | 2025

- Developed a real-time AI surveillance system for threat detection using computer vision, face recognition, emotion analysis, and audio processing with a web dashboard

- Built a full-stack application using Python Flask APIs and React.js for live camera monitoring and alert visualization
- Implemented face recognition using InsightFace and object detection using YOLOV8 for suspicious activity detection
- Developed panic detection using DeepFate emotion analysis and Librosa audio processing. Applied image preprocessing and video frame analysis to improve detection accuracy and reduce false alerts.
- Designed a local edge-processing system for secure real-time AI inference and faster response
- **Tech Stack:** Python, Flask, React.js, Tailwind CSS, YOLOV8, ArcFace, DeepFace, Librosa, OpenCV, MongoDB,

CERTIFICATIONS

- Python full stack - Qspiders Training Institute
- Python3.x programming course - Skill Rack
- Python for Beginners - Udemy

AWARDS AND RECOGNITION

- Finalist Recognition and Certificate of Appreciation at Ujjain Mahakumbh Hackathon 2025, a national-level technology challenge organized by the Department of Science & Technology, Government of Madhya Pradesh, for innovation, technical expertise, and problem-solving abilities displayed during the competition.

DECLARATION

- I hereby declare that all the information mentioned above is true and correct to the best of my knowledge. I am confident that my skills and experience will align with the organization's objectives if given an opportunity.
